Customer-obsessed, data driven Product Manager with 10+ years of experience in defining product vision and leading the product lifecycle for high-impact solutions. Shipped the last four Generative AI to 100M+ users, including Intuit's AI assistant and an agentic AI platform for Elastic. Proven track record of delivering high-impact, revenue generating software solutions, leveraging data-driven insights to drive significant user satisfaction and growth. Expert in leveraging AI to increase productivity by **4x**, resulting in quick product strategy, experimentation, build and test. Exceptional written and verbal communication skills with strong analytical/statistical skills, driving operational scale and measurable business impact.

Experience

Elastic – Senior Product Manager

11/2025- Present

Product lead building and scaling an agentic conversational AI platform (Agent Builder).

- Launched a new agentic conversational AI platform from concept to **GA in 2 months** and reached monetization by month 5, owning end-to-end product vision, strategy, and roadmap
- Built the pricing and packaging strategy for hosted billing and pay-as-you-go models, **growing revenue 79% month-over-month** (\$70K to \$125K).
- Scaled **daily active users** roughly **53x** and monthly **token usage roughly 110x** by aligning **7+ cross-functional teams** to extend Agent Builder across Elastic offerings
- **Reduced agent token costs by up to 40%** by collaborating with engineering and data science to architect context enrichment and context-engineering strategies
- Established a **product-led-growth motion** by partnering with Google, Anthropic, Cursor, and Microsoft to embed Agent Builder into the developer ecosystem.
- Multiplied personal **product velocity 4x** by building AI and LLM workflows in Claude Code and Cursor to synthesize feedback, analyze data, and produce PRDs, user journeys, and prototypes.

Intuit – Staff Product Manager

08/2021- 05/2025

Led 0-to-1 and scale-stage AI/ML growth platforms across US and international markets for 100M+ customers worldwide

- Pioneered a **0-to-1 GenAI-powered growth strategy**, leading a **40+ member team** to launch Intuit Assist, the global financial assistant, for **100M+ customers** and **driving \$18M in revenue**
- Demonstrated organizational leadership by scaling Intuit Assist to 3 product lines, contributing to **\$17M quarterly revenue**
- Built an **0-1 ML-powered recommendation engine**, driving **\$12M in monthly recurring revenue** from retained customers, through AI-driven personalization, cross-selling and retention strategies in US and international markets
- Drove **\$10M incremental revenue** and **20% conversion rate improvement** by designing and executing rigorous A/B tests with statistical rigor, leveraging data to inform decision-making and translate complex analytical findings into actionable product improvements for user flows
- Simplified in-product Search experience leveraging AI capabilities, improving customer engagement by 15%
- Increased customer acquisition and retention, contributing **\$7.9M in revenue** by building a referral platform, implementing and A/B testing "Invite a Friend", "Refer-an-Expert" programs
- Partnered with global teams to build **0-1 lead management platform** orchestrating data between vendor Ad platforms, CDP, CRM and Marketing automation systems, **generating 50% more sales ready leads** and **reducing CAC by 17%**
- Increased customer help resolution rates by 15% by leveraging RAG-based AI to enrich software models, demonstrating the application of AI for improved operational efficiency and reliability in customer support
- Refined NLP algorithms and training datasets for domain-specific intents and tone sensitivity, including implementing AI safety features such as proactive profanity filtering and bias detection, which **reduced escalation rates by 12%**
- Improved personalized targeting and customer segmentation by 19% by building a Data Enrichment platform capability, directly contributing to more efficient and reliable user experiences
- Drove **75% reduction in development time** by aligning **10+ cross-functional teams** on product vision, strategy and unified roadmap, delivering presentations, product demos to C-level executives and in Conferences
- Championed comprehensive go-to-market strategies, ensuring personalized messaging of value propositions to **100M+ users** worldwide, and effectively collaborating with marketing teams for seamless product delivery
- Explored and implemented early-stage AI testing frameworks to evaluate model performance and identify potential biases

- Collaborated with cross-functional teams (design, research, legal, compliance, marketing, engineering, data science) to develop and test complex software solutions for hyper-personalized consumer experiences
- Mentor emerging product managers and cross-functional teams, strengthening AI platform expertise across organization contributing to a high-performing culture focused on collaboration and continuous improvement

NetApp – Product Manager, Enterprise e-Commerce

07/2017- 07/2021

Responsible for drive customer growth and product success by leading high-performing teams, building digital retail e-commerce and AI-powered solutions, and optimizing customer experiences. Drove product strategy, development, and go-to-market to increase customer engagement and revenue

- Boosted evaluations by 215% and generated Sales Opportunities by \$500M by building a 0-1 eCommerce platform
- Led high performing global team to implement go-to-market strategy to increase **Subscription Renewals by 15% YOY**
- Generated **\$35M+ pipeline opportunities** by collaborating cross-functionally to integrate eCommerce platform with Salesforce CRM, Marketing Automation platforms
- Quantified revenue gaps worth **\$380M** and **proposed business plans** to C-suite and executive teams
- Implemented an AI-chatbot software solution for the NetApp marketplace, boosting conversion rates by 33% and customer engagement by 27%, and resulting in a 9-point NPS increase (46 to 55)
- Cross-functional collaboration to launch new features for AI-chatbot, including order tracking, reminder and notifications, contributing to 27% increase in customer engagement
- Led NetApp Insight conferences in 2018 and 2019 from creative implementation, messaging and demos, and being the spokesperson to visitors and industry experts
